NEW VARIETIES NOT LISTED IN CATALOG

see price list

— DEARING —

The best self-fertile variety that has been released. A bronze variety that is very productive. The fruit is medium to small and of excellent quality. DEARING will pollinate all female muscadine varieties such as Scuppernong and Hunt.

see price list.

— HIGGINS —

The largest fruited of all muscadine varieties, having a beautiful pink to reddish bronze color. The clusters are large, almost round and very compact. Quality and production are both very good. HIGGINS is one of the few muscadines that have edible hulls. A valuable addition to any home or commercial vineyard.
